THE ABC'S OF FALL PROTECTION

A — Anchorages

are a secure point of attachment. Anchorage connectors vary by industry, job, type of installation and structure. They must be able to support the intended loads and provide a sufficient factor of safety for fall arrest.

B — Body Support

harnesses distribute fall forces over the upper thighs, pelvis, chest and shoulders. They provide a connection point on the worker for the personal fall arrest system.

C — Connectors

such as energy-absorbing lanyards or self-retracting lifelines connect a worker's harness to the anchorage.

D — Descent and Rescue

devices are used to raise or lower a fallen injured worker to safety or retrieve them from a confined space.

E — Education

is essential. We offer a variety of training and consultative services to fit your needs.

F — Fall Protection for Tools

helps make work environments safer and more productive by reducing dropped object incidents.

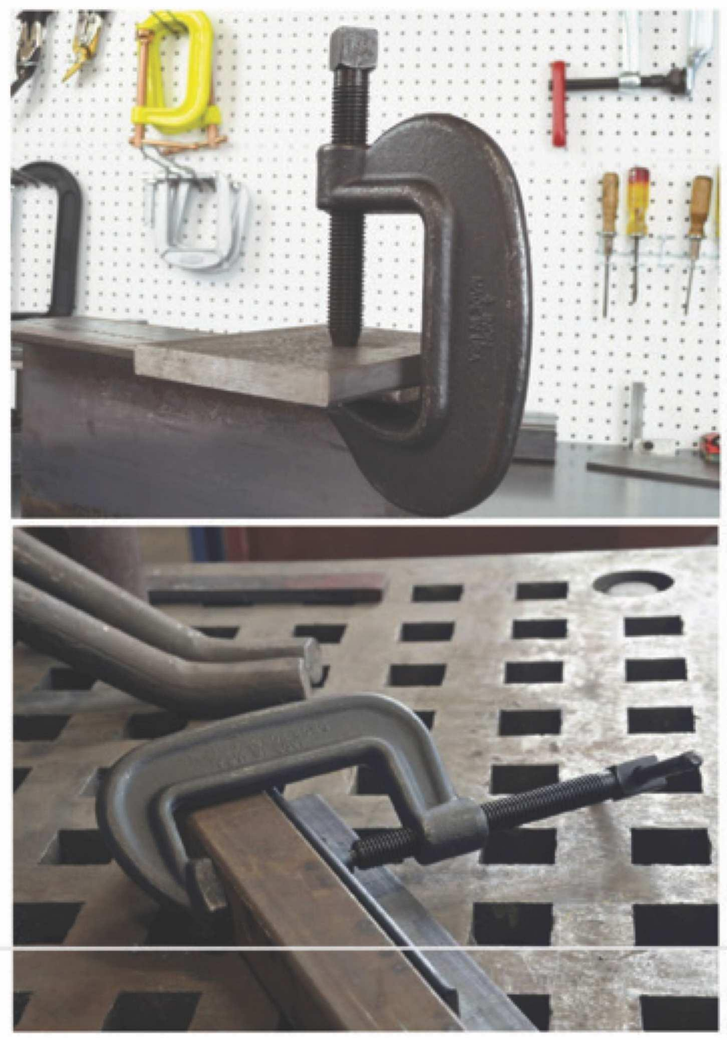
C-Clamps

Drop forged C-Clamps

C-Clamps are used for many trades and if you're going to use a C-Clamp why not use the best... BESSEY® has a wide variety of C-Clamps to choose from, ranging from light duty to heavy service.

The heaviest & strongest of the drop-forged "C" clamps are the B-HS series. The BESSEY Heavy Service series of clamps are sometimes referred to as "bridge clamps". These are made for the heaviest of steel construction & fabrication projects. Heavy square head on end of spindle designed to be used with wrenches & power tools - they do not have sliding pin T-handles like lesser clamps.

1. **Drop forged**
   For a longer lasting tool.
2. **Square head for maximum torque**
3. **Heat-treated frames**
   Designed for heavy industrial and construction applications.
4. **Clamping force**
   Clamping forces up to 40,000 lbs



Heavy service HS series (fully closing)

The toughest of the C-clamps with a clamping pressure of up to 40,000 lbs. Square head on the spindle.

	Clamping Capacity	Throat Depth	Clamping Force	Approx. Weight

Heavy duty 100 series C-clamps

The 100 series of drop-forged "C" clamps are made in the USA & have been carefully engineered for greater strength than the CDF series are ideal for heavy industrial & construction applications. These clamps have sliding pin T-handle as well as a square head for maximum torque & flexibility.

Drop forged C-Clamps

Regular duty CDF, CDFCHV deep throat C-clamps

These "C" clamps have heavy-duty drop-forged, heat-treated frames.

CDF series feature a black powder coat finish, the handle, spindle and pressure pad assemblies have a black oxide finish.

CDFCHV series feature a high visibility yellow powder coat finish, the handle, spindle and pressure pad assemblies are copper plated to resist weld spatter.
