Calk-In

Machine Bolt Anchor

The Calk-In is a pre-assembled precision cast calking type machine bolt anchor which can be used in concrete, block, brick or stone. The anchor consists of an antimonial lead alloy calking sleeve and a Zamac alloy internally-threaded expander cone.

General Applications And Uses:

- Windows
- Screens
- Sliding doors
- Shutters

Features And Benefits:

- Readily accepts machine bolts
- Internally threaded anchor for easy removability and service work
- Shallow embedment

The Double

Shield Expansion Anchor

The Double is a dual expansion machine bolt anchor particularly suited for materials of questionable strength. It can be used in solid concrete and some block, brick and stone base materials. Jobsite tests are recommended when used in base materials of questionable strength.

Features And Benefits:

- Performs in base material of questionable strength
- Internally threaded anchor for easy removability and service work
- Corrosion resistant body

When properly set, anchor indicator will leave blue paint in recessed cavities. Note: blue does not have to be removed from all four top surfaces to be fully set.

The Smart DI+ Anchor (Drop-In) is an all-steel dropin style anchor. **The patented Smart DI+ Anchor design reduces the amount of force required to set the anchor by up to 50%.**

- Installs with reduced effort compared to traditional drop in style anchors
- Internally threaded anchor for easy bolt removability and service work
