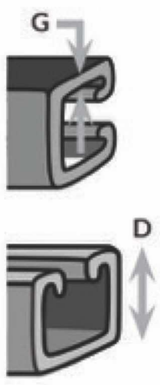
5 QUESTIONS TO ASK — WHEN SELECTING THE RIGHT G-STRUT® CHANNEL

1 GAUGE AND DEPTH

What minimum gauge (material thickness) and depth (profile size) are required for the job?

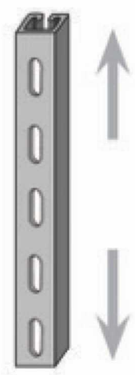


12 Gauge (.097)
- 1 5/8" x 13/16" D
- 1 5/8" x 7/8" D
- 1 5/8" x 1" D
- 1 5/8" x 1 3/8" D
- 1 5/8" x 1 5/8" D
- 1 5/8" x 2 7/16" D
- 1 5/8" x 3 1/4" D

14 Gauge (.071)
- 1 5/8" x 13/16" D
- 1 5/8" x 1 5/8" D

2 LENGTH

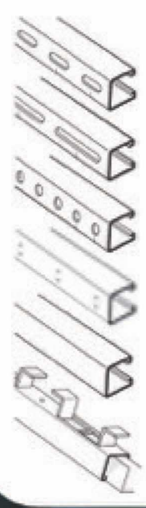
What channel length will best serve our end use?



- **Standard 10'** (Shorter runs for easy handling)
- **Standard 20'** (Typical for longer runs)
- **6'8"** (Typical for commercial joists distance)
- **Custom manufactured-to-length** any size 4" to 24'

3 PERFORATION

What "hole pattern" (if any) will best serve the job function?



- **Oval Slot** (OS) (Half slot) [9/16" x 1 1/8" x 2" on ctr.]
- **Long Slot** (LS) (Elongated slot) [13/32" x 3" x 4" on ctr.]
- **Round Hole** (H) [9/16" Diam x 1 7/8" on ctr.]
- **Knock Out** (KO) [7/8" Diam x 6" on ctr.]
- **Solid** (No perforation)
- **Continuous concrete insert**

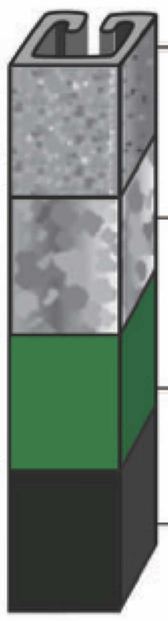
4 MATERIAL

What "substrate" will best serve the job function?

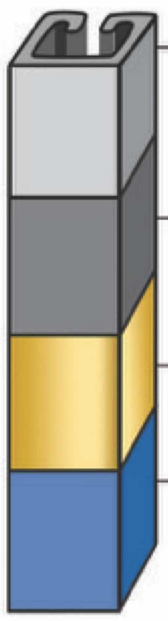
- **Steel** (Carbon steel, structural grade, 33,000 min yield)
- **Stainless steel** [Grade 304 or 316]
- **Aluminum**
- **Fiberglass**

5 FINISH

What type of finish or coating will best serve the construction?



- **Pre-galvanized** (Continuous galvanized)
  - G90 zinc coating weight for cost-effective long-term galvanic and barrier corrosion protection
- **Hot-dipped galvanized**
  - (HDG – after fabrication, batch dip) where aqueous or exterior applications require greater corrosion protection
- **Powder coat (Green)**
  - Powder coated, heat cured, topical coating (custom colors also available)
- **PVC coated** (May PVC coat over plain or galvanized)
  - Heavy PVC coat for extended barrier protection or cosmetic effects



- **Galvannealed**
  - Paintable pre-galvanized material requires no pre-treatment. Easily spray or dry fall painted post-installation
- **Plain**
  - Untreated, "plain" steel with no topical/barrier coating
- **Yellow zinc (Gold)**
  - Yellow zinc electro galv.
- **PVC coated** (May PVC coat over plain or galvanized)
  - Heavy PVC coat for extended barrier protection or cosmetic effects
