Anchor Materials: Zinc Plated Carbon Steel, 304 Stainless Steel

Head Styles: Hex Nut, Acorn Nut, Round Head, Phillips Flat Head, Threshold Flat Head, Tie-wire

Size Range: 1/4" dia. × 5/8" L. to 3/4" dia. × 6-1/2" L.

Suitable Base Materials: Concrete, Block, Brick & Stone

RED HEAD CONCRETE ANCHORING SYSTEMS LDT® Screw Anchor

Patented Sawtooth™ threads for easier installation in 5/8" & 3/4" sizes

- Uses ANSI drill bits
- Cuts its own threads into concrete
- Made of hardened carbon steel and zinc plated
- Finished hex washer head with anti-rotation serrations prevents anchor back-out
- Anchor head is stamped with a length identification code
- **Size Range:** 3/8" & 3/4" diameters. 1-3/4" to 6" lengths
- **Suitable Base Materials:** concrete, masonry, block
- Stainless steel anchors are gold-colored while the carbon steel anchors are silver-colored

AVAILABLE USA

Hilti® Compareable:
LDT Anchors: Compare to HUS-H Screw Anchors

COMPARE:

A. 1/2" LDT Anchor
Fast installation
Easily removed
Finished Head

B. 1/2" Adhesive Anchor
5-Step installation
Permanent application
Exposed threads

C. 5/8" Wedge Anchor
Nut & washer assembly
Difficult to remove
Exposed threads

Smaller drill bit size required
LDT anchors specify a smaller & less expensive drill bit than those required with the 1/2" adhesive threaded rod or the 5/8" wedge.

Shallower hole depth required
At 4-1/2" embedment the LDT anchor will give your performance similar to 1/2" adhesive anchor of the same depth or 5/8" wedge anchors at 7" deep.
